

as a subscriber of XM Sattelite radio, I feel that there is no need to try to take away services that I willingly pay for to keep from having to listen to the watered down garbage that I am forced to lisaten to by the radio stations controlled by the NAB. I have not listened to Radio in over 2 years since purchasing my now three radios to make sure that I never have to listen to there redundant garbage again. I will fight with everything that I have to keep these people from telling me what I can and cannot listen to!
